

WinStrip 2352

(Non-Chlorinated Solvent Aluminum Safe Paint Stripper)

◆ Highly Effective On a Wide Variety of Paints

◆ Quick Acting Stripper

WinStrip 2352 is a highly effective paint stripper on essentially all types of paints, and powder coatings from virtually all types of metals. Its unique blend makes **WinStrip 2352** the product of choice for aluminum stripping. Unlike many other paint strippers that use two parts, **WinStrip 2352** is a one-part stripper that works well on various substrates. There is no longer a need of having a stripper for ferrous metals and another for non-ferrous metals. For stripping paint or powder coatings, use **WinStrip 2352** as received. **WinStrip 2352** is unsurpassed as a non-chlorinated paint-removing product. Its high effectiveness on aluminum has become very popular with aluminum painting companies. It will not attack the aluminum, as does many other one and two part paint stripping systems do. **WinStrip 2352** has a low evaporation rate and no readhesion of paints can be expected with this product. It is easily rinsed with water. When used properly, the tank life should be between 4 – 6 months depending on the stripping situations.

TYPICAL PROPERTIES

Appearance

Clear, pale yellow liquid

Odor

Amine Odor

Specific Gravity

1.195

MATERIAL SAFETY

WinStrip 2352 is safe to use for paint stripping on Aluminum, Brass, Copper, Zinc, Cast Iron, Galvanized and Galvaneel Steel, Mild Steel and Stainless Steel. When contaminated with more than 10% water, certain metal safety fails.

STORAGE

WinStrip 2352 should be stored in a cool dry place.

SAFETY:

KEEP OUT OF THE REACH OF CHILDREN. Please refer to the MSDS for all warnings.
